

PERSISTENT BURNING OF REFUSE ON CAMPUS STREETS/HALLS OF RESIDENCE

This is to draw the attention of the University community to the persistent burning of collected refuse in the Halls of Residence and the surroundings by some of the cleaners.

The Management particularly, implores cleaners to stop this act forthwith as the hazardous smoke/fume is not only a pollution of the environment but could also precipitate respiratory health problems. Furthermore, it can cause fire outbreak in the University.

Please be informed that any cleaner caught in the burning of refuse on campus streets will be dealt with accordingly.

Signed
Omotayo O. Ikotun (Mrs.)
Registrar
