

DANGEROUS DRIVING AND PROHIBITION OF STRAY ANIMALS ON CAMPUS

This is to further draw the attention of the University community to the excessive speeding by some motorists, especially teenage motorists mainly due to the recent massive rehabilitation of roads on campus. As the second semester of the 2007/2008 begun on 4 February, 2008 the Management pleads with motorists on campus to please drive with care to avoid road accidents.

The Management particularly, implores parents and guardians to warn their children/wards against dangerous driving and over-speeding. Motorists are please urged to have consideration for other road users especially on campus.

Please be informed that any motorist caught in the act of dangerous driving will be dealt with according to the Law.

Also, members of the University Community are reminded that the law prohibiting stray animals on campus is still in force. In this regard, any stray animal caught will be impounded by the Veterinary Teaching Hospital.

Thank you.

Signed
Omotayo O. Ikotun (Mrs.)
Registrar
